I am writing to tell you how pleased I am with [Intestive*]. For the past year and a half I have had chronic problems with irritable bowel syndrome (a condition which has been a problem on and off for the past thirty years!). I felt as if I would never feel better, no matter what the doctors prescribed. Using the [Intestive] has made a vast difference! I feel that the [Intestive] has gotten my problem under control and I am feeling so much better. Thank you for such a remarkable product. I am anxious to have my cholesterol levels checked also, to see if [Intestive] has had a positive effect on that also!

Sincerely,

Linda R.

{slide-vertical-closed=Kathy L.}

About a year ago I developed symptoms of irritable bowel syndrome, most likely related to stress. I had all the classic symptoms of bloating, pain in the lower left descending colon, mucous-like bowel movements and general intestinal discomfort.

I must admit that I did not run to a gastroenterologist, not wanting to be subjected to a GI series, etc. I tried acidophilus, peppermint oil capsules and a colon cleansing product recommended in a health store but I still had the problem.

My dentist and his wife, a Naturopathic Physician, recommended your product, [Intestive*], to me.

It "changed my life" then. I started taking 3 capsules in the morning and 3 at night and within a day or two, I had no intestinal discomfort or problems. I read all the literature and keep it on file in my patient library where I work as a librarian.

Thank you for your help in designing and promoting [Intestive].

Sincerely,

Kathy L.

{slide-vertical-closed=Ralph Z.}

I have used Seacure (the main ingredient in Intestive*) in my practice for chronic bowel syndrome, Crohn's disease, and ulcerative colitis. My clients have responded positively and in a relatively short period of time. Depending on the client's illness we have had results as quickly as two weeks and some towards four to six weeks. My clients have less to no pain, the bowel movements improve towards a more normal bowel movement.

I do feel it is a very good product. I also feel the patient's eating program is also of uppermost importance.

Sincerely,

Ralph Z.

*Seacure is now available directly to the consumer in INTESTIVE!

{slide-vertical-closed=April B.}

Roughly two years, five months ago, only weeks before beginning a Ph.D. graduate program I first experienced symptoms of ulcerative colitis. Over the course of the next two years the symptoms worsened and became quite serious.

When I first became sick I was prescribed immuno-suppressant drugs that got rid of the symptoms right away. But then I became aware of the potentially dangerous side effects of the medication. At the very least I did not cherish the idea of becoming dependent on medicine that worked to suppress the immune system. After coming off of the immuno-suppressant medicine the symptoms returned worse than ever. So then I was prescribed anti-inflammatory drugs which worked on and off but did not control the symptoms completely. The condition worsened to the point that five months ago I was on the anti-inflammatory medicine; yet during the worst flare-ups I was unable to eat even rice without getting sick.

So I was quite desperate when I ordered my first bottle of [Intestive*], but within the first week of taking the supplement all of the symptoms of ulcerative colitis had vanished. That was roughly five months ago and today I don't think I ever have felt healthier in my life.

...Although my insurance company covered the expensive immuno-suppressant and anti-inflammatory medicines, it will not cover [Intestive]. But I will continue to buy [Intestive] because it works! I really cannot thank you enough.

Sincerely,

April B.

{slide-vertical-closed=Jean B.}

Thank you very much for speaking with me on the telephone. I had some intestinal problems as long as I could remember. Now after having my children and re-occurring kidney problems (treated with antibiotics and getting older, 75) I had developed a problem of explosive diarrhea at times. Often right after a meal. With no way of knowing when it would happen, I dreaded going anywhere away from my home.

I am taking 6 capsules of [Intestive*] daily for the past 2 months. The results are amazing. I have now been able to stop using fiber and acidophilus among other things. Actually the cost of [Intestive] will be less than what I was using, with very little results. I will continue to use [Intestive] and be thankful that I finally found out about you.

Jean B.

{slide-vertical-closed=Rebecca L.}

I developed diarrhea in August 1996. I tried over the counter medicine. This did not work. I began seeing a naturopathic doctor in September 1996. She prescribed different remedies to no avail. She ran blood work -- everything came back fine.

I changed doctors in October 1996. He began doing allergy treatments and prescribed more fiber. This did not help and I was becoming more weak and depressed. He suggested doing a \$350 stool culture. I had run out of money by now. I was told if I did not get this diarrhea stopped I would end up in the hospital. I did not have any more faith in this doctor. I had previously done a parasite cleanse. I changed doctors once more.

Dr. Tom L., Scottsdale, Az. prescribed [Intestive*] nine capsules a day. My diarrhea ceased that same day. Also, my ulcer went away. I am 32 years old and my children and husband are very thankful they have their mom/wife back. God bless you for a wonderful product.

Sincerely,

Rebecca L.

World Champion Triathlete JulieAnne White

Dear Proper Nutrition,

I wish to thank you for making a superior supplement which has allowed me to return to competition and lead a higher quality of life due to improved health. Enclosed you will find a pictorial account of my athletic career in triathlon and running with accounts of a serious illness which forced my retirement from triathlon. Briefly, to give you a quick history in 1992 I finished second in the Ironman and won the World Ironman series held in Kona, Hawaii each year. The race consists of a 2.4 mile swim, a 112 mile bike followed by a 26.2 mile marathon. My best time for this distance was 9:08, however in 1993, I developed some difficulties to which many specialists have not been able to explain a possible cause or reason after exhausting all necessary tests. After the completion of the Ironman in 1993 I was rushed to emergency and within twelve hours I had half of my large intestine removed as I was suffering from peritonitis and my system was septic. Due to the severity of my state I was given a colostomy that subsequently has been reversed. However, for a

while I suffered from problems of malabsorption, scar tissue and adhesions due to the number of surgeries of which there were three.

My nutritionist, Dr. Kathie H., N.D., suggested I try Seacure in 1996, and I now take Intestive. The results have been wonderful, my strength returned and my health has been exceptional. I returned to running in competitions in 1997 and have not looked back since, I am now able to train and compete with the same success I enjoyed before my surgeries. Intestive has enabled me to enjoy a wonderful and healthy life once again. Thank you for making an exceptional product!

Sincerely,

JulieAnne W.

{slide-vertical-closed=Dierdre A.}

I wanted to thank you for sending me the Intestive. I have been struggling with intestinal problems for over two years with symptoms ranging from pain and distension to inflammation and feeling like I have the flu. My diagnoses have included Crohn's Disease, Ulcerative Colitis, Candida and IBS. Frankly, I have tried many protocols and have occasionally found some relief by using them, but nothing has worked over the longer periods of time required. I have found that if I take Intestive consistently, the symptoms are significantly lessened. In fact, the reduction in inflammation has been a great blessing. I would recommend the product to anyone suffering from an intestinal disorder.

{slide-vertical-closed=Janis A.}

Proper Nutrition,

You deserve applause for the product Intestive you have developed. I am singing—your product has been a godsend. I am a 20-year sufferer of IBS-Diarrhea. As the years have grown in number so did my symptoms. I turned to everything I knew of—prescription meds, flax oil, peppermint tea, digestive enzymes, classic over-the-counter diarrhea meds, lsbacol, and Lotronex (I was in the study group, but developed severe constipation and had to drop out); so the search continued.

I found your banner on the IBS.org chat line and started with your product 4/1. I am only getting better. Normal bowel movements, without pain—something I longed for. Beforehand I suffered with vomiting, fever, and diarrhea, sometimes causing me to hit the bed. I am in love with your product and would gladly share my success story.

Janis A.

{slide-vertical-closed=Michelle S.}

Dear Proper Nutrition,

I wanted to tell you that Intestive has been truly AMAZING for me! I've been a long-time sufferer of LGS/IBS, but it's been quite bad the last year. I noticed minor improvement in both bowel function and energy in just 3-4 days of Intestive (4-6 caps/day), which was very encouraging.

It's now been nearly two months since I started taking Intestive, and I can't believe how much better I feel. In fact, I was taking four capsules at night and seemed to have TOO much mental energy at times - so now I take two at night and 1-2 during the day.

The only other supplements I take now are Citrucel for fiber, and Natren's Digesta-Lac (*Lactobacillus bulgaricus*) to keep down my canker sores - both just once a day. Now I'm doing better than I have for at least a year, maybe more.

I tried so many products before Intestive to no avail - Swedish bitters, digestive enzymes, flax seed, fish oil - some even seemed to make my problems worse. I didn't have a lot of hope for Intestive but I had a gut feeling (pardon the pun) that I should try it because it was something that seemed so inherently healthy it couldn't hurt.

Two friends have ordered Intestive and another bought a box from me and will probably buy more himself. I'll continue to spread the word!

Thanks again,

Michelle S.

BTW, I'm pretty sure I learned about Intestive from seeing a banner at <http://www.ibsgroup.org/>.

{slide-vertical-closed=William M.}

Received by email:

Just a short note to tell you of my complete satisfaction with Intestive. I had my colon and rectum removed two years ago (colon cancer) and was given a permanent ileostomy.

My gastroentologist had me on Pentasa (3 capsules, 3 times per day) before the operation and told me to stay on it after the surgery. While taking the Pentasa, I had severe cramps and couldn't keep taking it. That's when I started taking Intestive and stopped taking Pentasa.

(Pentasa 250 mg Capsule, Sustained Action Generic Name: Mesalamine Uses: This medication is used to treat swelling and inflammation of the colon or rectum. It is often used to treat ulcerative colitis.)

My stomach cramps ceased, I have good bowel movements and feel so much better for making this switch.

William M.
